Objective

Detail-oriented Web Developer with a comprehensive skill set in front-end and back-end technologies, aiming to deliver user-friendly, responsive websites and applications. Adept at combining creativity with technical expertise to develop efficient, visually appealing solutions. Seeking to leverage my skills in a collaborative environment to build dynamic digital experiences and continually advance my development knowledge in fast-paced, innovative projects.

Skills

- Languages & Frameworks: Proficient in HTML5, CSS3, and JavaScript, with hands-on experience in React, React Native, Redux, jQuery, and Bootstrap for front-end development. Skilled in back-end technologies such as Node.js, Express.js, and databases like MongoDB and SQL.
- UI/UX & Design: Strong understanding of UX/UI principles and design tools such as Figma, Sketch, Adobe XD, and Photoshop. Experience with Material UI, Styled-Components, Tailwind CSS, SASS, SCSS, and LESS for building visually appealing and responsive web interfaces.
- Content Management Systems (CMS) & E-Commerce: Experienced with CMS platforms like WordPress, Shopify, Kajabi, Webflow, SquareSpace, and SharePoint. Capable of building dynamic, browser-compatible websites that align with project goals and user needs.
- Version Control: Skilled in using Git, GitHub, and Bitbucket for version control and collaboration. Experienced in managing branches, creating pull requests.
- Tools & Technologies: Extensive experience with NPM, APIs, DOM manipulation, Wire-framing, Testing, and Debugging for ensuring performance optimization and error-free code.
- Cross-Platform Development: Developed mobile applications using React Native, focusing on creating seamless experiences across iOS and Android platforms.
- Microsoft Office Suite: Proficient in Microsoft Office applications, including MS Word, Excel, PowerPoint, Outlook, and Access, with a strong ability to create professional documents, manage data, and handle presentations.
- Soft Skills: Strong in communication, adaptability, collaboration, creativity, and time management. A critical thinker with strong analytical and problem-solving skills, attention to detail, and a passion for continuous learning and growth.

Experience

May 2021 - PRESENT

Freelancing, Remote- *Web Designer / Developer*

As a freelance web designer and developer, I have successfully executed multiple projects for clients across various industries, including **Nashville Apartments**, **SmartHires**, and **Bravo Protection Security Services**. I have managed all aspects of the web development and design, from concept to deployment, ensuring seamless user experiences and optimized website performance.

Duties and Responsibilities:

- Developed responsive websites using HTML5, CSS3, JavaScript, and Bootstrap, ensuring compatibility across multiple devices and browsers.
- Conducted user testing via interactive prototypes, improving user experience through continuous feedback and refinement.
- Collaborated with UI/UX teams to integrate design and engineering insights, aligning development goals with overall project objectives.
- Designed custom web icons adhering to visual guidelines to enhance the user interface.
- Initiated coding of prototypes for testing and product improvements, contributing to a seamless product refinement process.
- Worked closely with stakeholders to define product goals and manage the end-to-end development of fully functional prototypes.
- Showcased expertise in UI, UX, Visual Design, Web Design, creative management, user flow design, wireframing, and prototyping.
- Delivered CMS training and assisted clients with website creation, template management, and content updates.

- Managed SEO optimization, conducted software upgrades, and fixed issues such as broken links to ensure website efficiency.
- Organized, wrote, and revised content, managed online inventory, and executed digital sales campaigns for clients.
- Monitored website traffic, analyzed changes in sales trends, and implemented strategies to enhance performance.
- Led the development of WordPress and Shopify websites, focusing on UI design, layout, and front-end/back-end development.
- Guided the architecture of WordPress websites, ensuring they were visually attractive, easy to navigate, and user-friendly.

Jan 2021 -May 2021

Scholars Playground, Sacramento, Ca – Web Developer

As a Web Developer at Scholars Playground, I played a key role in enhancing the user interface and developing web solutions that improved user engagement and performance. I worked closely with cross-functional teams to create user-centered designs and transition web architecture into more scalable, modern frameworks.

Duties and Responsibilities:

- Crafted UI and interaction guidelines, ensuring consistency in user experience across the platform.
- Maintained and troubleshooted the Scholars Playground website, addressing technical issues and ensuring smooth functionality.
- Conceptualized user-friendly designs to improve site navigation and usability.
- Created wireframes, storyboards, and sitemaps to visualize the layout and flow of the website before development.
- Presented designs and prototypes to peers and executives, incorporating feedback to refine and optimize the user interface.
- Established design guidelines and best practices to maintain brand consistency and high design standards across the platform.
- Collaborated with the team to re-architect the web app into a React single-page application (SPA), improving speed and efficiency.
- Developed the website on the Kajabi platform, implementing features and ensuring smooth integration with the platform's CMS and tools.

Education

Certificate in Full Stack Web & Mobile Development Nucamp Coding Bootcamp | March 2020

- Completed a comprehensive program covering a wide range of technologies, including HTML5, CSS3, JavaScript, Bootstrap, React, Redux, React Native, React Bootstrap, Reactstrap, Node.js, Express, MongoDB, SQL, Git, and GitHub.
- Gained hands-on experience in Styled-Components and developed skills in building responsive web and mobile applications.

Completion of project based training in Full Stack Web Development Clever Programmer | December 2022

- Achieved mastery in JavaScript and React.js, gaining in-depth knowledge of full-stack web development principles and practices.
- Developed practical skills in building dynamic, responsive web applications using modern development frameworks and technologies.

Certificate in JavaScript Coding/Programming and Problem Solving Online (Udemy) | April 2020

- Completed an extensive course focused on JavaScript, enhancing skills in problem-solving and logical thinking.
- Gained proficiency in error debugging, code tracing, Boolean logic, data structures, algorithms, and object-oriented programming (OOP).

Bachelor of Computer Science Herat University | 2016

- Earned a degree in Computer Science, providing a strong foundation in programming, algorithms, data structures, and software development principles.
